PROFESSIONAL SUMMARY

Senior Full-Stack Engineer and Engineering Team Lead with 5+ years of experience designing, building, deploying, and maintaining production web and mobile applications, enterprise platforms, SaaS products, and AI-integrated systems. Experienced across frontend architecture, backend engineering, databases, cloud infrastructure, DevOps, and technical leadership, with a strong track record of translating business requirements into reliable software and measurable operational improvements.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, React Native, Tailwind CSS, Ant Design, Redux Toolkit

Backend: Node.js, NestJS, Express.js, REST APIs, Prisma ORM

Databases: PostgreSQL, MongoDB, Database Design, Query Optimization

Cloud & DevOps: AWS, Oracle Cloud Infrastructure, Docker, Linux, Nginx, PM2, CI/CD

AI & Automation: OpenAI API, Groq API, LLM Integrations, AI Workflows, RAG-style Pipelines

Tools: Git, GitHub, Postman, Figma, Firebase, Jest

PROFESSIONAL EXPERIENCE

Engineering Team Lead — Zoracom

Lagos, Nigeria | 2025 – Present

- Lead a diverse team of engineers and designers across multiple concurrent projects, providing technical direction, delivery oversight, sprint planning, and architectural guidance.
- Restructured engineering workflows into specialized QA, DevOps, Security, and Database responsibilities, creating clearer ownership across projects.
- Introduced standardized application templates that increased new-project setup speed by 50%.
- Manage deployments, infrastructure monitoring, and production operations, reducing cloud infrastructure costs by 40%.
- Mentor engineers, support technical hiring and onboarding, and bridge communication between stakeholders, product, design, and engineering teams.

Full-Stack Developer — Zoracom

Lagos, Nigeria | 2023 – 2025

- Built and maintained production enterprise applications using React, TypeScript, NestJS, Prisma, and PostgreSQL across regulatory, service management, HR, and workflow automation domains.
- Built and maintained a government-facing regulatory request and certification platform that digitized contractor requests, inspection workflows, certifications, renewals, and related processes, reducing manual paperwork by 90% and improving processing speed by 70%.
- Continue to manage the regulatory platform’s maintenance, issue resolution, operational support, and ongoing improvements. The platform has generated over ₦1 billion in revenue.
- Built service management capabilities covering billing, ticketing, inventory, maintenance, and operational workflows.
- Developed a mobile application for field task management, enabling field agents to view assigned tasks, track progress, and submit completed work.
- Built employee lifecycle management features covering onboarding, payroll, appraisals, and reporting, streamlining administrative workflows and reducing manual work.
- Managed AWS deployments and production infrastructure, optimizing resource usage and reducing cloud costs by 40%.

Front-End Developer — Zoracom

Lagos, Nigeria | 2021 – 2023

- Built responsive business applications, dashboards, CRM interfaces, customer support tools, and operational platforms using React, TypeScript, Redux Toolkit, and Ant Design.
- Built a customer support platform that streamlined ticket management and improved customer service operations.
- Developed a telecom observability dashboard with a 5-person team, transforming raw client data into actionable operational insights for management.
- Revamped a CRM interface using RTK Query, improving application performance and the experience of sales teams.

INDEPENDENT PROJECTS

Qikenv — Environment Variable Management Platform

Website: qikenv.cloud

Secure environment-variable management platform designed to make application configuration safer and easier to manage across development and production environments.

- Provides secure management and synchronization of environment variables across projects and environments.
- Includes CLI workflows for pulling, pushing, linking, inspecting, and managing configuration.
- Supports multiple organizations and projects through a multi-tenant architecture.
- Provides environment-level access control and configuration management.
- Supports versioning and history for tracking configuration changes.
- Designed to reduce the risks associated with manually sharing .env files while improving developer workflows.

Technologies: TypeScript, Node.js, CLI, PostgreSQL, NestJS, Prisma, cryptographic security, npm.

QikCV — Job Search & Application Pipeline

Website: qikcv.com

Job-search platform designed to streamline the process of discovering relevant opportunities, preparing tailored application materials, and tracking job applications in one workflow.

- Automatically discovers and ingests job opportunities, reducing the need for manual job-description entry.
- Filters opportunities by freshness and relevance, with a focus on recently published roles.
- Generates tailored CVs and cover letters using a master CV and individual job requirements.
- Provides a centralized pipeline for tracking job applications and application progress.
- Helps users assess how their experience aligns with specific job requirements.
- Supports a reusable master CV that can be adapted for different opportunities.

Technologies: React, Vite, TypeScript, Ant Design, Tailwind CSS, Redux, NestJS, Prisma, PostgreSQL, OpenAI/LLM integrations.

EDUCATION

BSc, Estate Management

Nnamdi Azikiwe University, Awka, Nigeria | 2015 – 2020
